

EN 54-11, **C€**

Description

460 manual call points connect to non-addressable fire detection control and indicating equipment, or to addressable fire detection control and indicating equipment that can accept non-addressable devices¹.

A pressure-activated displacement element provides a safe and convenient way for building occupants to manually initiate a fire alarm condition.

Resetting the manual call point is achieved by inserting a key through the underside of the unit to replace the operating face to the quiescent position.

The 460 range of manual call points provide fire detection and alarm system designers with a Standards-compliant, economical product for life safety and property protection applications.

Features

- Pressure activated displacement element provides a safe user experience
- Integral alarm indicator available
- Resettable with simple key operation
- Suitable for indoor use
- · Wide operating voltage range
- Compatible with 2-wire and 4-wire fire detection and alarm systems
- Easy installation
- Low maintenance

Compliance

460 manual call points have the following compliance.

	EN 54-11 a	CE		
460-001 ^b	✓	✓		
460-002	✓	✓		
460-003 ^b	✓	✓

Accessories

The following accessories are compatible with 460 manual call points.

Description	Part Number	Datasheet
Contact input module	620-002	31-0027
MCP transparent operating face cover	460-007	_
MCP weather proof enclosure	460-009	31-0078

460 non-addressable manual call point

Specifications

	460-001			
	460-002	460-005		
	460-003	460-006		
	460-004			
Operating voltage	DC (5 ~ 33) V			
Quiescent current	0 A			
Circuit impedance during alarm condition	0 Ω or 470 Ω	0 Ω		
Operation type	Direct operation (type A) ^a			
	Red LED			
Alarm indicator	Visual indication of operating element displacement			
Terminal wiring	(0.4 ~ 2.5) mm ²			
Operating temperature	(-10 ~ +55) °C			
Operating humidity	(0 ~ 95) % RH, non-condensing			
Storage temperature	(-25 ~ +80) °C			
Storage humidity	(0 ~ 98) % RH, non-condensing			
Dimensions (h × w × d)	(87.5 × 87.5 × 56.5) mm			
Ingress protection rating	IP-42			

^a As defined in EN 54-11: "a manual call point in which the change to the alarm condition is automatic (i.e. without the need for further manual action when the frangible element is broken or displaced)".
